Professional Summary

Motivated and detail-oriented student with 2.5 years of experience in ETL testing and data pipeline development. Strong foundation in Machine Learning, Deep Learning and data science with hands-on experience in Python, Scikit-learn, TensorFlow, and real-world project work. Familiar with Deep Learning techniques, including Convolutional Neural Networks (CNN), applied in project implementations. Eager to apply skills and coding expertise to solve complex problems in an internship setting.

Key Skills

- **Programming:** Python, Java
- **Libraries/Frameworks:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Flask.
- **Techniques:** Supervised Learning (Regression, Classification), Unsupervised Learning (Clustering, Dimensionality Reduction), Feature Engineering.
- **Deep Learning:** Convolutional Neural Networks (CNN), Artificial Neural Network (ANN)
- **ML Tools:** Jupyter Notebook, Google Colab

Data Engineering & ETL:

- **ETL Tools:** Informatica.
- **Data Validation & Testing:** SQL (Oracle), Data Quality Validation.
- **Data Processing:** Apache Spark (PySpark), Pandas

Tools & Technologies:

- **Databases:** MySQL, MongoDB
- **Cloud Platforms:** Azure ML, .
- **Big Data Tools:** Hadoop (Basic).
- **Version Control:** GitHub
- **Automated Testing Tool:** Selenium

Soft Skills:

- **Problem-Solving:** Analytical mindset to optimize algorithms and data pipelines.
- **Collaboration:** Strong teamwork and communication to integrate ML models into production environments.
- **Adaptability:** Fast learner with the ability to adopt emerging ML technologies.

Education

Master of Computer Application (MCA) *Pursuing*
National Institute of Technology, Agartala

Bachelor of Science in Computer Science *2021*
Thakur College of Science and Commerce, Mumbai
CGPA: 8.87%

Higher Secondary Certificate (HSC) *2018*
Utkarsha Vidyalaya & Junior College, Mumbai
Percentage: 64%

Secondary School Certificate (SSC) *2016*
Jai Deep Vidya Mandir High School, Mumbai
Percentage: 75%

Technical Experience

Infosys Ltd. *July 2021 – January 2024*
Role: Senior System Associate / ETL Tester

- Designed and optimized ETL pipelines for large-scale data warehouse environments, ensuring efficient data ingestion and transformation.
- Automated workflows using Python, reducing manual effort by 25% and improving process efficiency.
- Developed Python scripts to detect anomalies in data pipelines and generate automated reports for faster issue resolution.
- Conducted comprehensive data quality assurance, implementing robust validation frameworks to ensure data accuracy and integrity.
- Collaborated cross-functionally to identify opportunities for machine learning integration, introducing anomaly detection models to monitor pipeline health.

Projects

Real-Time Gender Detection

Tools & Technologies: Python, TensorFlow, OpenCV, CNN

- Developed a deep learning-based system using Convolutional Neural Networks (CNN) to classify gender from facial images.
- Processed and trained on a dataset of over 3,000 labeled images to achieve high accuracy in face recognition and gender classification.
- Implemented OpenCV for real-time face detection, ensuring smooth and efficient image processing.

- Optimized model performance by fine-tuning hyperparameters, reducing error rates, and achieving a detection accuracy of over 90%.

Sentiment Analysis of Customer Reviews

Tools & Technologies: Python, Scikit-learn, Pandas

- Designed and implemented a supervised learning model to predict customer sentiment based on review datasets.
- Conducted extensive data preprocessing, including text cleaning and tokenization.
- Built and evaluated classification models (Logistic Regression, Random Forest) to analyze sentiment (positive/negative).
- Improved model accuracy by 15% through feature engineering.

MockAnalysis: Automated Mock Test Result Analysis System *Tools & Technologies: Python, Selenium, Pandas, Matplotlib*

- Designed and developed an automated system to scrape and analyze mock test results from web portals using Selenium.
- Processed and visualized data using Pandas and Matplotlib to provide detailed insights into performance trends.
- Automated report generation, reducing manual effort and time spent on analysis by 40
- Hosted the project on GitHub, showcasing clean code practices and detailed documentation.

Extracurricular Activities

- **Volunteer, College Fest Committee**
Assisted in planning and organizing technical events, seminars, and cultural activities.

Hobbies

- Reading
- Photography
- Traveling

Certifications

- **Accenture North America - Data Analytics and Visualization Job Simulation**
Credential ID: 2tG6WLM2W5Yv9jJ
- **Infosys Certified Selenium with Python Automation Tester**
- **Infosys Certified Software Development Engineer in Test (SDET)**
- **Infosys Certified Digital Assurance Professional**
- **Infosys Certified Python Programmer**
- **Infosys Certified Data Management Associate**
- **Machine Learning Foundations**
Issued by Great learning
[View Certificate](#)
- **Computer Vision Essentials**
Issued by Great Learning
[View Certificate](#)
- **Python for Machine Learning**
Issued by Great Learning
